Normal 0 21 Normal 0 21 **The physical model**

The physical model of the arrangement of the geometrical space of the magnetic fields that come into being in the whirling mass of matter which is influenced by the magnetic space of the universe. The model shows how the magnetic centres of the whirling lump of matter " also of a planet are arranged which cause the coming into being of the crystalline magnetic space. Also a principle arising from the crystalline construction of the magnetic space is visible here which determines the motion of the magnetic poles.
