THE GEOMETRICAL PROPORTION OF THE ARK OF THE COVENANT AND OF THE CRYSTALLINE GRAAL

In the spatial geometry there is a formation of three solids of identical size in the form of cuboids which have a common centre. A regular formation of these solids comes into being firstly; - when their heights which at the same time are the axis of each of them and they will intersect in the centre of the length, secondly; - when they are deflected from each other by the same angle, thirdly; - when the lengths of the bases of these cuboids in relation to their heights will be fulfilled in relation 3: 3: 5. The Divine Matrix of the Evolution comprises also the proportions of the Ark of the Covenant in reference to geometrical forms. The definition of such a pattern is the description of the mathematical operation on the plan of geometry which I deduced from the construction of the matrix: - The base of the equilateral triangle " which lies in the area of the circle of which the radius is equal to the length of this base " has the proportions 5: 3: 3 in relation to the perpendicular straight lines which run from the apexes of this triangle to the circumference of the indicated circle.

http://www.andrzejstruski.com/articles_182_The-matrix-of-a-physical-and-spiritual-man.html In reference to the biblical transmission that refers to the Ark of the Covenant, the proportion 3: 3: 5 is identical as 1,5: 1,5: 2,5 of the cubit. I have reached the mathematical derivation of these proportions in the process of the construction of the spatial form composed of regular tetrahedrons of equal size. Here is the link to the description of the process of the creation of this form and to the pictures that illustrate it: http://www.andrzejstruski.com/articles_55_The-solid-figure-.html Consequently, the whole solid is a geometrical pattern which refers to the Old Egyptian transmissions that refer to graal connected with the black rock. The link below indicates the article which contains the description that refers to the crystalline graal. http://www.andrzejstruski.com/articles_49_The-Platonic-geometry-of-the-solid-figure-AMAZ.html As far as I know the cubit that is being indicated in the biblical transmissions is equal to the length of 48cm, this length allows one to count the measurements of the Ark of the Covenant as 72: 72: 120cm.
